

Labelprint for CD-AUDIO/ CD-ROM/ DVD 5/ DVD 9

You can carry out the design individually.

CAUTION: When using a CD/DVD Logo, please make sure that you have the correct logo and the current version. (*can be found under „Service“ on our home page*)

Printing is possible as an OFFSET or SCREEN PRINTING process.

In this connection, the following points need to be taken into account:

OFFSET PRINTING: Suitable for pictures motifs, 4-colour motifs with fine screen definition.

ADVANTAGE: 60 line screen.

DISADVANTAGE: Colours may possibly appear dull/ slightly pale due to glazing.
Surfaces tend to show colour variations.

Black surfaces should beset up with 75% C/ 75% M / 75% Y / 100% K.

SCREEN PRINTING: Suitable for surface area motifs. Printing with special colours* (*100% cover*)

ADVANTAGE: Colours are fully covering and glossy.

DISADVANTAGE: 40 line screen; bit-mapped motifs tend to show moirés.

*Colours should be trapped in relation to each other (see **).*

COLOUR:

- the data can be created with special colors (in this case: screen printing).

*We print using the Pantone-Solid-C or the HKS-K colour guide.

- Please specify the precise performance of the label in your order - e.g.:

White - yes or no, colours, varnish - yes or no.

- Delete Colours not used from the colour list of the print file.

! This information is only an extract. You can find all important details for the preparation of the data (e.g. tonal value, line widths, cover, register mark Problems, ...) on our home page under „Service“/ „LABEL - Infos for the preparation of data“ ** !
